

Jiff Fisher proved to be an exceptional programmer and technical leader during his GSP Midterm project. He impressed me with his programming knowledge, his vigor for problem solving, and his dedication to his project, despite technical challenges. After seeing his quality of work, and talking with him, I've become confident in his abilities, and convinced of his future successes. He has been a rare student, one who is driven to succeed in more than just official assignment. I expect that he will do great things with technology in his life, and hope to hear of his future success.
